

ABSTRACT

This paper is entitled “Teaching Writing Narrative Text in class Eighth using Problem Based Learning with Video”. The objective of this research are: 1) to describe scenarios and implementation of teaching writing narrative text in class eighth using problem based learning with video, 2) to know responses of teacher and students of teaching writing narrative text using problem based learning with video, 3) to find out students difficulties in learning writing narrative text using problem based learning with video in eighth grade of SMP 3 Pasundan Cimahi in the academic year of 2019-2020. This research used qualitative descriptive method. The instruments used in this research was observation, interview, questionnaire, and test. The research subject was VIII D, in the class consists 30 students. The results of the study were based on scenario observation sheet data and its implementation in pre-activity where students could participate in the learning process, participate actively, and understand the direction of the researcher then whilst-activity with students doing and analyzing assignments in groups and finally post-activity with students being able to present and conclude learning outcomes according to what has been designed and planned so that the teaching and learning process becomes more focused. Then the responses in the interview data and questionnaires indicated that students became more active, confident, motivated to get achievements, more eager to participate in learning, there is interaction and socialization with friends, think critically. The difficulties faced by students from the aspect of sentence resolution and the intrinsic element with and achievement level 5 to 10 in the resolution sentence and 0 to 40 in intrinsic aspect and then the difficulty of understanding English and lack of vocabulary. The suggestion is making this moment to introduce more English with a better and more fun method in the future.
