

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

This chapter presents conclusion and suggestion based on the results and discussion in chapter four. The researcher presents the conclusion of the answers to the research questions.

A. Conclusion

Based on the results and discussion of the research, it can be concluded that:

1. This research and development produced products in the form of interactive learning media in the form of narrative text videos using the Canva application for English language learning in grade VIII junior high school. The steps taken to produce this interactive learning media was as follows: a) potential and problem identification stage; b) data collection stage; c) product design stage; d) product validation stage; e) product revision stage I f) small-scale trial stage; g) revision stage II; h) large trial stage; i) final product stage. The developed learning media is also equipped with a summary of the material, not only practice questions.
2. Based on the validation from the three media experts, it can be seen that the validation results were 87% or good for use with a little revision from experts.
3. Based on the results of the responses teacher from the two trials carried out, it can be seen that the result for the small-scale trials were 85% and

the result for the large-scale trials were 87.5%, this means that the product can be used with very good responses. While the student response results for the small-scale trials were 74% and the result for the large-scale trials were 80.6%, or very good and interesting.

B. Suggestions

Based on the results of this research and development, the following can be suggestions for teacher and students are given as follow:

1. The development of interactive video learning media products using the Canva application is expected to be used for English language learning so that it will make it easier for students to understand the material presented. As well as improving reading skills in learning English, especially Narrative Text material.
2. Considering that the results of research and development products can provide benefits for learning, it is recommended for teachers to develop this product with a wider scope or in other materials, even in other subjects in the future.
3. Teacher's must be better able to understand the development of learning vocabulary worksheets in the world of education to introduce learning to students who are better and better than this product.
4. The need for further development of interactive video learning media using Canva applications or other applications that support the improvement of learning quality.
